Workshop Information:

How do we work towards mutual spiritual evolution of all beings?

Jacqueline shares how she communicates with bees and how her book, 'Song of Increase: Listening to the Wisdom of Honeybees for Kinder Beekeeping and a Better World', came into being. She encourages ways to work alongside the bees that nurture their presence in the world community.

We are being called to know bees in a deeper way, to change our relationship with the bee kingdom and thus all nature. We become privy to the secrets they carry in their daily relations with the earth, the cosmos, and us all. This experience of the sacred nature of bees opens our hearts, enfolding us into their natural environment and carrying us into a holy relationship with Gaia.

This is not a 'how to keep bees' workshop. Instead we work to understand their nature and work with the relational aspects of being around bees as they call our attention to subtleties that stretch us beyond our own boundaries and perceptions, bringing joy to our connection with them and with all of Nature.

Bees may communicate with us through a variety of methods. We will invite them to share information with us that will make their -- and our -- lives more fulfilling. We will interact with honeybees from a place of receptivity, respect, goodhearted intention, and informed right action. These methods may be carried out at home as we each find our own ways to enrich our relationships.

Jacqueline is a biodynamic farmer who lives in the Pacific Northwest (USA). For 15 years she has immersed herself into

understanding and creating a loving bee culture. Her book confirms what many of us believe about the heart and soul of honeybees. www.SpiritBee.com.
